

## Major Projects at PORTS

# X-326 D&D *(Decontamination & Decommissioning)*

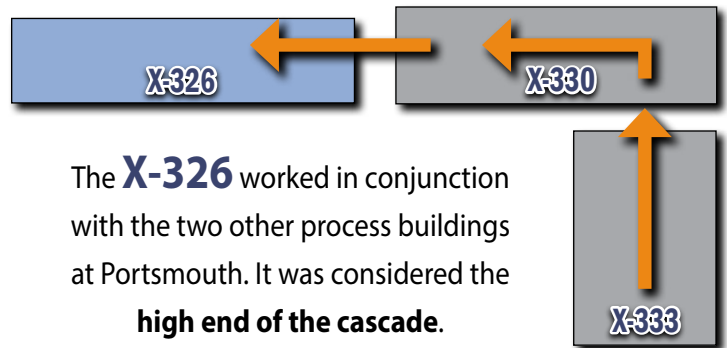

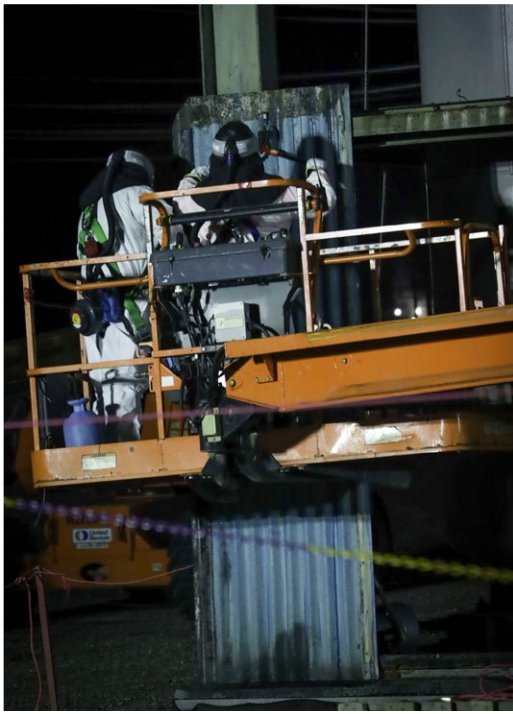

### The **X-326 Process Building**

originally produced highly enriched uranium for use in the nation's defense program and nuclear Naval vessels.

Since 2012, more than

# 7,000 process components

have been carefully removed.

The **X-326** worked in conjunction with the two other process buildings at Portsmouth. It was considered the **high end of the cascade.**

The **X-326 Building** was approximately **1/2 mile long**

**One Half Mile**

- 880 Yards
- 2,640 Feet
- 7 Football Fields

As of March 2022, the project was more than 60% complete.

The **final power source** was removed Sept. 25, 2019
