# HOW DO YOU STAY INFORMED?

## Envoy Program

DOE is introducing an Envoy Program to provide stakeholders in the four-county region a trusted, transparent and timely source of two-way communication regarding information on activities of the D&D of the Portsmouth Gaseous Diffusion Plant.

An Envoy is a DOE or Fluor-B&W Portsmouth volunteer who delivers information about a project's mission, schedule, plans and upcoming key decision points to a community group, and then relays the group's input back to management so decision makers can better understand the public's opinions and values.
