

U.S. DEPARTMENT OF ENERGY

# WHAT HAS BEEN DONE TO DATE ?

## Groundwater Cleanup

- More than 1,000 groundwater monitoring wells installed around the site.
- 628 million gallons groundwater treated since early 1990s. (20,900 rail tanker cars).
- More than 35,000 pounds degreasing solvent (TCE) removed from groundwater.
- Trichloroethene (TCE) has not impacted any residential drinking water.
- Methods used to address TCE in groundwater include building a slurry wall, pump and treat, and oxidant injection.
