## Safety Task Assignment

FBPs Safety Task Assignment (STA) process significantly impacts the success of our safety culture and the reduction of incidents. The interactive process requires that management/supervisors and employees shall:

- Define the general task for each activity.
- Identify known and potential safety hazards associated with the task.
- Determine work practices to complete the task safely.
- Address requirements for all personal protective equipment.
- Establish that all crew/department employees understand the above information.
- Each crewmember is empowered to continuously participate in this process in an effort to promote our ZERO Incidents culture.
- Safely execute the task as described—if conditions change, revise accordingly.
- Ensure prompt reporting of any injury, no matter how minor, to the project Supervisor.

STAs will be completed daily prior to work start & when tasks/conditions change. Post this STA in an obvious place throughout the duration of the task. Each crewmember involved with the task will sign this STA.

**Know the emergency procedure for your work area!**
